

How to write ISO files to CD

ISO files are images of complete CDs and can be loaded into several different CD recording software packages to create CDs.

ISO Recorder Power Toy (Freeware)

ISO Recorder is a Windows XP freeware utility that uses native Windows XP functions to write images to a CD. You can download this utility from the author's Web page. When the program is installed, it is automatically associated with the ISO file extension in Windows Explorer.

Install ISO Recorder

- Download the ISO CD image to a folder on your computer.
- Insert a blank CD in your CD-RW drive.
- Start Windows Explorer.
- Locate the ISO file, right-click the file name, and then click **Copy image to CD**

Alternatively you can right-click your CD-R drive and choose **Copy Image to CD**. In the new window browse to the ISO file and click Next.

Nero - Burning ROM (Ahead Software) <http://www.nero.com>

- Download the ISO CD image to a folder on your computer.
- Insert a blank CD in your CD-RW drive.
- Start Nero Burning ROM.
- Follow the wizard steps to select Data CD creation.
- When the wizard closes, click Burn Image on the File menu.
- In the Open dialog box, select the ISO file, and then click Open.
- In the wizard, click Burn to write the image to the CD.

EasyCD Creator (Roxio) <http://www.roxio.com>

- Download the ISO CD image to a folder on your computer.
- Insert a blank CD in your CD-RW drive.
- Start Windows Explorer.
- Locate the ISO file, right-click the file name, and then click Open to start EasyCD.
- In the Write Method section of the CD Creation Setup dialog box, click Disk at Once for optimum recording performance.
- Click OK to write the image to the CD.
